

Going to the Doctor

Level: A2 Topic: Health

Last week, I felt sick, so I went to the doctor. I had a headache and a sore throat. The doctor was very kind. She asked me questions about my symptoms. I told her about my headache and that I felt tired. She listened to my heart and checked my temperature. After that, she said I had a cold. The doctor gave me some medicine and told me to rest. She also advised me to drink plenty of water. I went home and took the medicine. After a few days, I felt better. I learned that it is important to visit the doctor when I am not well.
