

A New Recipe

Level: B1 Topic: Cooking

Sarah loves to cook and often tries new recipes. Last week, she found a recipe for a delicious pasta dish online. The recipe was simple and required only a few ingredients: spaghetti, tomatoes, garlic, and basil. Sarah decided to make it for dinner. She went to the grocery store to buy fresh tomatoes and basil. When she got home, she started cooking right away. First, she boiled the spaghetti until it was al dente. Meanwhile, she sautéed the garlic in olive oil and added the chopped tomatoes. After a few minutes, she mixed in the cooked spaghetti and fresh basil. The smell in the kitchen was amazing! Sarah served the pasta with a sprinkle of cheese on top. When her family tasted it, they all agreed it was the best pasta she had ever made. Sarah felt proud and decided to write the recipe in her cookbook. She plans to invite her friends over next week to share the dish with them, hoping they will love it as much as her family did.

Questions

1. What type of dish did Sarah make?

- A) A salad
- B) A pasta dish
- C) A dessert
- D) A soup

2. Which ingredients did Sarah need?
